PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building high-performing, user-centric mobile and web applications using React Native, React.js, and JavaScript. Hands-on full-stack experience designing and developing scalable backend services with Node.js and Express.js, including RESTful API development, CRUD operations, authentication/authorization, database schema design, and query optimization. Proficient in TypeScript, Redux (Toolkit and Saga), API testing, and version control with Git, with a track record of delivering production-ready apps across iOS and Android.

SKILLS

- Programming Languages:** JavaScript, TypeScript, React Native, React.js, HTML5, CSS3, Node.js (Express), Core Java
- Mobile Development:** React Navigation (Drawer, Bottom Tabs), Deep Linking, Animation (Lottie, Custom), Component Reusability, UI/UX Design
- State Management:** Redux, Redux Toolkit, Redux Saga, Context API
- Backend and APIs:** Node.js, Express.js, RESTful API Design and Development, CRUD Operations, JWT Authentication and Authorization, API Testing (Postman, Swagger), API Integration
- Databases:** MySQL, Cassandra DB, Database Schema Design, Query Optimization
- Cloud and Services:** AWS (Lambda, S3 Bucket), Firebase (Crashlytics, Analytics), Stripe Payment Gateway
- Tools and Platforms:** VS Code, Git (Version Control), Postman, Bootstrap, macOS, Windows, Linux
- Soft Skills:** Problem-solving, Team Collaboration, Time Management, Communication, Adaptability, Attention to Detail, Critical Thinking

EXPERIENCE

Software Engineer — Kushals Fashion & Jewellery

Bengaluru, India · Nov 2024 – Present

- Building and maintaining cross-platform mobile applications with React Native.
- Developing e-commerce features for the company's fashion and jewellery platform.
- Collaborating with product and design teams to ship production-ready features.

Software Engineer — FPLE Technology Private Limited

Bengaluru, India · Jan 2024 – Oct 2024

- Designed and implemented scalable UI/UX solutions for cross-platform mobile applications using React Native and React.js.
- Reduced API response times by 30% through performance optimization, ensuring seamless user experiences across iOS and Android.
- Developed and deployed complex components for production, increasing customer retention by 25% through user-focused designs.

- Integrated React Native frontends with RESTful backend services, implementing authentication/authorization flows and CRUD data layers for production features.
- Enhanced app stability by identifying and resolving 50+ critical bugs using debugging tools like Postman and Swagger.
- Collaborated with cross-functional teams, ensuring on-time delivery of 3+ client-facing projects with zero post-launch escalations.

Junior Software Engineer — Spurtree Technologies Private Limited

Bengaluru, India · Aug 2021 – Dec 2023

- Built and maintained reusable React Native components, improving project delivery efficiency by 15% across multiple applications.
- Executed complex Redux logic for data-driven applications, streamlining workflows and reducing API call errors by 20%.
- Created responsive web and mobile app UIs, achieving 99% cross-browser compatibility across platforms.
- Spearheaded integration of third-party APIs and backend services, reducing manual intervention by 40%.
- Designed and developed scalable RESTful APIs using Node.js and Express.js, implementing CRUD operations, JWT authentication, and database schema design, improving backend data processing speed by 25%.

PROJECTS

- **E-Commerce Application** — Implemented deep linking, Stripe payments, and custom animations, improving user experience by 30%. Managed state with Redux Saga and Context API; integrated RESTful APIs for WhatsApp sharing and payment history tracking.
- **Entertainment App** — Built registration and login screens with Firebase Crashlytics and Analytics integration; established Redux Toolkit for state management; streamlined data flow with RESTful APIs.
- **Child Development App** — Implemented complete navigation setups (drawer and bottom tabs) with TypeScript; engineered personalized development programs via RESTful APIs, improving user retention by 15%; configured Firebase Crashlytics and Analytics.
- **Maternal Health App** — Designed modular UI components and diet dashboards to assist 500+ users; integrated RESTful APIs and AWS services (S3 and Lambda) for a scalable backend; built stage-wise dashboards for conceiving, expecting, and parenting, boosting user engagement by 20%.
- **E-Commerce for Kids** — Developed a responsive web application with React.js and Node.js for 200+ vendors and buyers; secured the platform with JWT authentication; applied RESTful APIs for product uploads and pricing, increasing marketplace activity by 25%.
- **Face Recognizer – Security Authentication System** — Leveraged Python face recognition and OpenCV to analyze 68 facial landmarks, enabling secure user login with 95% authorization accuracy.
- **Drowsiness Detector – Road Safety App** — Created a drowsiness detection system with OpenCV; programmed alert mechanisms to play media sounds when eyes remained closed for more than 5 seconds.
- **Object Detection Using AI and ML** — Developed an AI-based system with the YOLOv5 algorithm to detect and classify 10+ object types with 90% precision; designed a scalable Python architecture for real-time object recognition.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science — Sri Krishna Institute of Technology, Bengaluru · 2017 – 2021

CERTIFICATIONS

- React Native — Meta (Coursera)

- [React JS — Scala](#)
- [Web Development — Eduonix Learning Solutions](#)
- [Python for Data Science and Analysis — Udemey](#)

KEY ACHIEVEMENTS

- Reduced API response times by 30%, enhancing user experience and app performance.
- Improved project delivery efficiency by 15% with reusable components.
- Increased backend data processing speed by 25% with optimized Node.js and Express.js APIs.
- Boosted customer retention rates by 25% with user-focused designs.
